NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

flew from pafa to pann, landed pann, departed PANN approx 4:50pm (AK TIME). The sky was clear with a 7kt wind from the north west. On the way back to PAFA landed at a spot i had landed at a few days earlier on the frozen Tannana River. It was a long strip of hard packed snow and ice made by the snow machines. It ranged in width from 10feet to 30 feet wide. I made 3 full stop landings then continued towards PAFA. At approx 5:15pm made a 4th stop for the purpose of urinating at an unfamiliar spot at a differen location on the river but on the same snow machine trail. Upon visual inspection the hard packed surface did not appear to be any different than that of where i had previously landed. When landing the main gear wheels hit soft snow. the plane stopped and rotated forward on the main gear, the propeller struck the snow and ice, the plane flipped over onto its back. the obvious damage was to the propeller, wings (tips and lift struts) and tail. After evacuating the aircraft called Fairbanks FSS on cell phone. The FSS coordinated a helicopter evacuation with the Alaska State Troopers. I Landed at PAFA with the rescue helicopter around 7:00pm.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This accident could have been prevented if i would have continued to my destination without making the unnecessary stop. I was unfamiliar with the spot where the landing was attempted. I let my bladder persuade me to make the stop.
