Email Report Instructions:

The narrative and attachments from this email report may be used in other reports at the discretion of the IIC. This email, including attachments (if applicable), should also be placed in the docket by the IIC.

Email Report:

The Vehicle Recorder Division received a Garmin AERA 796 GPS (m/n aera 796, s/n 2CY009397). The device was damaged in the accident and could not be operated, but the non-volatile memory chip on the circuit board was intact and successfully removed with lab equipment.

The memory contained on the chip was intact and contained data similar to chips read off of other Garmin AERA devices, but no track log data were recovered from the device.

Prepared by:

David Case, Interdisciplinary Engineer / Vehicle Recorder Specialist
