NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I had taken off from Six Mile Airstrip at approximately 1230 and flew around the local area on a sight seeing trip. The final leg of the trip took off from Sheep Mountain at approximately 1630L and we spent an hour enroute back to Six Mile. The previous 5 hours of flying on the day of the incident were uneventful. This incident occurred on the full stop landing at the end of the day.

On Sunday, August 12, 2012 at approximately 5:30pm I was returning to land at Six Mile Airstrip after a day of flying around the local area in my 1951 Piper Super Cub. I had one other passenger, Christopher Lazidis. We were on final approach to land and upon touchdown we bounced slightly. The tail wheel aircraft was sliding to one side of the runway and I applied controls to correct back towards the center of the runway. Once under control, I began to apply brakes...as it usually does in my airplane, the tail began to rise slightly with the application of brakes as the rotational force of the wheels slowing creates a moment up on the tail. My passenger did not realize that this situation was a normal phenomenon and began to wonder what was wrong. His immediate response actually applied increased brake pressure as he inadvertently stepped on the pedals at his feet. As I began to release the brake pressure to allow the tail to fall back to the ground, his simultaneous brake application actually created enough rotational force to drive the propeller into the ground and lift the tail up. We were semi suspended in air on the nose cone of the aircraft and then continued to flip onto the back of the airplane. Neither of us were injured in the incident.

My name is Russell Badowski, [REDACTED] I will gladly answer any questions.
Please let me know if you need anything else from me.
