NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Upon landing a/c began veering right of runway. Progressively applied left rudder ~~to~~ to point of full rudder control input ineffective. Attempted go-around unsuccessful, & aborted prior to ground loop. Terrain flat & land zone with more than adequate length. No wreckage distribution - A/c remained intact. Departure time from local private unidentified strip approx 7:30 P.M. intended flight duration = 1 hr. Incident occurred approx. 8:00 P.M. ~~then~~ Temporary repairs & ferry inspection by LHM aircraft of Birchwood. A.K.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Possible brake malfunction - undeterminable

In hind-sight - would not have attempted go around but would have used aggressive left braking. May not have prevented incident but would have eliminated increased speed from attempted/aborted go-around & thereby either avoided incident altogether or reduced speed & subsequently reduced degree of damage incurred.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

In review of FAR/AIM it is understood
this event should be considered an "incident",
not an accident.
