NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I pushed the aircraft by hand to the edge of the tree line as to get the most out of the strip that I could. After starting up the aircraft I did my usual preflight checklist and everything checked out normal. In preparing to takeoff I pulled one notch of flaps, and pushed full throttle. Upon reaching takeoff speed I pulled a second notch of flaps and was airborne. After becoming airborne, my left wing tip STOL kit fence caught on some overgrown vegetation. This vegetation wedged between the STOL fence and the leading edge cuff. This pulled back on my left wing, to which I had to correct with full right rudder. I got the aircraft correct and back on course in line with the strip but I was now passed the gravel section and was over low cut brush. The aircraft lost speed from snagging on the vegetation that it was no longer flying or able to climb. I tried to maneuver the aircraft to gain airspeed and be able to climb but couldn't get anymore out of it. After the failed efforts I made the decision to put the aircraft down in the brush before getting to the lake at the end of the strip. I pulled back the throttle and set it down, we rolled for about two seconds before the aircraft struck a large drift log with a six foot tall root ball on one end. The root ball contacted my left wing struts bending them heavily and damaging the left wing. My left gear leg and tire hit the log portion of the drift wood and bent the shock strut, letting the gear leg fold under itself. The gear leg folding under and hitting the log caused the aircraft to go up on its nose having a prop strike. At this point I turned off all electrical and we exited the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Be more diligent in trimming back overgrown brush
