Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Wrinkled wing skin, damaged vertical stabilizer/rudder, RH lift strut bent, fuselage skins at tail bent/wrinkled.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While landing aircraft was slightly high and about 5mph fast, floated past touch down point and put my feet up on the pedals to slowly brake, instead my heels got caught on the floor and I got a hold of the brakes harder than I wanted and the aircraft nosed over.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have been much more stabilized on final, corrected glide slope and stabilized speed, upon passing my pre picked touch down point I should have initiated an immediate go around, I essentially second guessed myself under a high workload, that I could salvage the poor approach, and should never have considered using any kind of braking to compensate for going long on touchdown.

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location

Exited through the pilot's door, after shutting off master switch and fuel selector, the fuel tanks were not breached. I was the sole occupant.
