9/3/2014, 1730 AOT. Wind light & variable from the south. Sky clear. Practicing takeoffs & landings at the Martin River strip (aka old Bradley H&A strip) (2000' x 60' gravel, runway 26) I had, minutes before, taken off #6 of the day from runway 26. In the right hand (due to terrain) pattern on downwind leg I set up a normal approach, which went well all the way to touchdown. Just after touchdown the airplane's tail began to slowly rise. I did not have enough elevator authority to put it down. The airplane continued rolling slowly forward (at one point a little quicker) onto its nose, striking the prop, and continuing over to rest upside-down on its wings. The right wing touched ground first and bent the lift strut. The airplane rocked once to break the strobe light mounted on top of the vertical tail fin.
