NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

The pilot obtained weather sources in the morning of 7/14/14 from his home computer. The pilot filed a VFR flight plan with Kenai FSS to Montague Island and said he would activate the flight plan when airborne. The pilot and passenger departed Wolf Lake airport (4AK6) at approximately 08:30am July 14th, 2014 and activated the flight plan with Palmer FSS.

The winds were calm and visibility was 20 miles or more. The low tide for the area was 9:24am. When we arrived at Montague island, we decided to land at Patton Bay on the Gulf of Alaska side of the island to beach comb. The pilot had previously landed on the beach at Patton Bay on 6/3/14. As the pilot descended the aircraft over the bay, he made two (2) passes over the beach landing area to observe any debris that may have floated in with the previous tides. No debris was found in the landing area. The aircraft touched down on the intended landing area and slightly bounced once and settled on the right landing gear. The pilot initiated left aileron to compensate and the left gear touched down. As the left gear touched down, the aircraft started to lower it's right wing and more left aileron was initiated. After this attempt the pilot then noticed that the right wheel was off the plane and rolling ahead of the aircraft, down the beach. The aircraft settled down on the right gear leg into the beach sand and separated from the plane. At this time the propeller and right wing came in contact with the beach. The aircraft slid approximately 25 feet on the under carriage and came to a rest. The aircraft settled down to a soft slide and the ELT didn't have to auto activate. The pilot and passenger exited the aircraft out of the pilot's door with no injuries.

Damage to the aircraft was the propeller, engine cowling, right wing aft of the flap, gear leg separation and possible horizontal stabilizer damage.

The landing area on the beach is subjected to the incoming tide so a helicopter airlift of the plane, had to be obtained immediately. The pilot by satellite phone scheduled the airlift of the aircraft and also scheduled an airlift of the occupants off the island. The helicopter arrived approximately 1:15pm and departed approximately 2:00pm with the aircraft to Seward, AK. At this time, the pilot closed out his flight plan with Kenai FSS by satellite phone. The occupants departed the island at approximately 6:00pm.
