Performed pre-flight inspection prior to adding fuel from Bristol Alliance at Shannons Pond dock. Filed flight plan that I would be flying over the mouth of nearby Snake River and adjacent lakes and activated prior to departure. Briefed passenger and performed run-up prior to taking off (approximately 9:15pm) heading ESE based on the ATIS and wind sock on the pond. Gave full throttle and while it seemed to take longer to get on step than usual, we were on step when I reached my decision point. Used full flaps and became airborne at which point I immediately lowered the nose to gain airspeed. The plane did not pick up as much speed as I anticipated. We were approximately 40 feet from the ground and with trees ahead made a decision to bank to the left rather than risk hitting the trees. The right wing lost lift and landed in boggy tundra adjacent to Shannons Pond. My passenger and I were able to exit the plane uninjured. We both walked to a nearby friend's house where I called NTSB to report the accident.
