On Friday July 24, 2015 N755, a FWS Found Bush Hawk aircraft departed Cold Bay, Alaska at approximately 1000 AKDT. On board were two FWS volunteers and a FWS pilot. The mission was to service and remove photographic equipment at Urillia Bay and Sennett Point located on the north and west side of Unimak Island approximately 110 miles from Cold Bay. The pilot stated that on arrival at Sennett Point, the wind was calm. The pilot and volunteers deplaned and collected the camera equipment and loaded them into the airplane. They then boarded the airplane and prepared for takeoff. The takeoff area consisted of a dog leg of 150 feet with a straight line run of 1000 feet for a total of 1150 foot for takeoff distance. Approximately 25-30 degrees of right turn was required from the dogleg to line up with the 1000 foot section of the takeoff site. Approximately 250 feet into the takeoff run (100 feet after the dogleg) the tail of the airplane came up and the airplane got light on the wheels (the Found Bush Hawk is a tail-wheeled aircraft) indicating that it was reaching takeoff speed. As the takeoff run continued, the pilot realized that he had not made enough correction to the right after the dogleg to get lined up with the straight portion of the 1000 foot takeoff area and was drifting further left. The aircraft hit a sloped berm approximately 5 foot high and launched into the air, clearing the creek at the end of the takeoff area. The aircraft stalled and settled to the tundra in a left wing down attitude. The fuselage hit the ground, bounced and came to rest approximately 180 degrees from the takeoff heading. The pilot manually activated the ELT and called the refuge headquarters to report the accident. Fortunately there were no injuries. The pilot and volunteers were picked up by the Coast Guard later that evening and transported back to Cold Bay
