Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Lower left longeron bent upward at the rear gear leg attachment.

Post-flight and post-FAA review of the aircraft, a disassembly of the floorboard and seats revealed a bent cross-member structure. Photos taken and shared with NTSB Anchorage Investigator Shawn Williams.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On Saturday 11 June, I and two (2) passengers (Larry Parcher, Marwan Wartez) planned to go flightseeing across the Tanana Flats and along the base of the Alaska Range, stopping in Chena Marina (AK28) to put on ten gallons of fuel.

After about an hour of flight time, I located a gravel-covered ridge-top west of Gold King Creek at about 3500 feet elevation at approximately 64.09 N, 148.08 W. The site had a prominent flat 'nose' running uphill to the south which made for a suitable landing site. Because I hunt in that area, I decided to inspect the ridge to ensure its suitability for future use. I set full flap landing configuration facing upslope and touched down with the main wheels.

The aircraft bounced once then rolled fairly smoothly until it bounced again. I applied full power and reduced flaps to 40 degrees. Before we could get airborne, the aircraft felt like it hit a previously unseen object. The plane did become airborne and felt normal, so we turned back towards FBX. The front passenger door came unlatched and the passenger was unable to close it in flight. As such, we landed at Gold King Creek airport (AK7) to close it. While on the ground we reviewed the landing gear and didn't note any damage to the gear legs or shock absorbers.

After the flight, during a subsequent review of the gear legs, I found wrinkling in the fabric above the left aft gear leg. On Monday morning I called my mechanic to discuss, and he stated this fit the NTSB definition of 'accident' and required reporting. I verified the reporting requirements with AOPA, and called NTSB to report the accident.
