Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Fuselage structure separated just forward of the landing gear boxes. Fuselage separated along rivet line just forward of fwd cargo door. Nose gear separated from aircraft structure. Left wing separated from fuselage. Engine crankshaft broken near propeller hub and engine was inverted at crash site. Propeller blades broken and bent. Pilot yoke broken. Empennage just aft of the rear window separated from fuselage.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flying passengers and cargo from Goodnews Bay to Quinhagak. Departed Bethel empty, collected 6 par in GNV and deposited in KWN. During return flight to GNV, weather at Platinum was reporting VFR ceilings and light wind. Actual ceilings were approximately 800', visibility was 10 SM. Traveling west of the hills at Jacksmith Bay, I decided to try a pass through the mountains north of GNV instead of following the bay around from the west. While traveling into the mountains, the valley became constricted and ceilings prohibited further travel. I opted to make a climbing 180° turn into the clouds in an effort to avoid terrain. During the maneuver I entered the clouds and lost sight of terrain, eventually striking the hillside.
