Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

damage to both spars on outer left wing, damage to at least ribs and leading edge of right wing, landing gear ripped from lower longerons, prop and cowling damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On November 22, I was flying wildlife surveys for the Alaska Department of Fish and Game under part 91 rules. We departed Bethel at about 10:50 am. At approximately 1:30 pm we landed on a sand bar to take a break. We departed a few minutes later and on climb out I noticed my oil pressure had red lined at 100psi. My oil temp was reading 138 deg. I reduced power to 2150rpm and oil pressure came down to 90 psi. I decided to head back to Bethel and investigate the high oil pressure. We slowly climbed to around 1000 feet agl and watched the engine gauges. All engine gauges were in the green except the oil pressure which stayed in the yellow at 88-90 psi. Out of habit, I pulled carb heat to check for carb ice. At about 1:47 pm we had smoke start pouring into the cabin. I could tell by the smell it was not an electrical fire. I turned into the wind, pulled the power to idle, put on full flaps, and descended, planning to land immediately if I saw flames. After a couple of seconds there were no flames and the engine was still running smoothly with no noises out of the ordinary. I made the decision to land on a small lake nearby. I added back the power as I turned crosswind to downwind. As I was adding the power in the turn the engine quit. (fuel was on both with a little over half tanks) We made a forced landing on the tundra. No one was hurt in the landing. We removed our survival gear and I pulled the elt out in case the plane caught on fire, after seeing it did not have a remote antennae I left it in the plane. We used our Delorme tracker to notify my wife that we needed a pick up. She coordinated with Renfro's Alaskan Adventures to have us picked up by another airplane which arrived later that afternoon and flew us safely to Bethel.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

I don't see anything at this point in time that I would have done different but I will continue to think about it and ask questions. I am always looking to learn how to be a better, safer pilot.
