Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

broken landing gear, cabane vee, bottom cowling, belly, and bent wing strut

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On November 25 at approximately 12:50 I departed Jackfish Landing airport and headed up the Knik river/ lake George area for a afternoon flight. Weather was partly cloudy in Wasilla and mostly sunny up knik with unlimited visibility. Winds were calm. At approximately 1:30, while in cruise flight the engine quit and idled to a stop forcing me to make an emergency landing. There were no injuries but the aircraft sustained damages to landing gear, belly and one with strut. Upon post landing assessment noticed the 5 amp Inj. Fuse was popped.

I called some friends on my satellite phone and got a ride home.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Pending investigation of the actual cause of engine quitting, may install some different components in fuel or ignition system.
