NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Aircraft came out of annual, flight was intended to go across the inlet and get landing currency. Takeoff was started with flaps 10, pulled second notch to assist rolling out the right float. At about 400' AGL, I attempted to retract my flaps. The flap handle was jammed with the flaps at 20 degrees. I advised tower I was entering the downwind for the west. I was told to extend and land behind an aircraft landing on the strip. I was searching for traffic, about 600' AGL and doing 70mph with flaps 20 when the engine quit. Impact was within about 1/8 of a mile from that point. I was trying to land on the grass in a park, but was unable. Clipped a tree and light pole before impacting a townhouse. The aircraft came to rest in the street. During the crash I was drenched in fuel. I exited the right hand door, and after checking on the house (which was unoccupied), I removed the fuel soaked shirt and returned to the plane and shut off the master. After being checked out by paramedics, I was asked by the firefighters to shut off the fuel. Once the aircraft was secure and the remaining fuel was extracted, it was loaded up and moved to Seaplanes North at Lake Hood.
