Andy Lyran and I departed to deliver Del to Colorado creek around 8:10 AM. Just beyond Wien lake enroute #2 engine started to run rough. We determined our closest viable runway was Marley hot springs and ~~we~~ set a course for that airport. Shut down #2 engine + feathered ~~the~~ enroute to Marley. Taxied down at Marley and were unable to stop A/C by end of runway and went down embankment ~~to~~ at end of runway.
