Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i>		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. See attached sheet.		

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This is currently under investigation.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

July 10, 2018 crash DeHavilland DHC-3T Otter

6:15 am flight Ketchikan to Steamboat Lodge and return. Checked wx and cams etc. Told by dispatch that wx was reported ceiling 500-800ft at Steamboat. Departed about 6:25 with 4 pax and 852 lbs baggage. Uneventful flight. Route Skowl arm over pass lake, Trocadero inlet then between San Fernando island and Lulu island. Observed low ceiling and rain over Lulu island but 500 or better on my route, and clearing north end of Lulu to Steamboat bay. Uneventful landing.

Waited on the bay while 959 finished unloading, reconfigured to carry baggage and freight, and cleared the dock.

Departed Steamboat about 7:45 am w/ 10 pax and a small amount of baggage. Proceeded toward Klawok, cloud generally high, 800 to 1500 ft, occasional light rain near Steamboat. Reported position to Ketchikan Sunny Hay. During this time I heard 959 report to Sunny Hay that Salzer portage was wide open. In Klawok area observed rain near the western end of Big Salt. Also observed rain on the eastern end of Klawok lake (the dog leg to Harris river) and thus decided to continue south in good conditions. Also observed rain and lower ceiling above Trocadero in the 12-mile pass area.

Proceeded past Waterfall. Rain and 500 ft ceiling in that area, clearing and higher cloud shortly after Meares passage. Was able to see Hydaberg from about there so proceeded toward Hydaberg. Followed Hydaberg river toward Hetta inlet, in good ceiling but lowering w/ rain approaching Hetta. Fuel at this point was about 120 gallons, or about 2 hours. Descended to approx. 600 ft. but climbed to approx. 1100 ft in this area, at which I wanted to transit Salzer. As I arrived over Hetta I could see up Dog Salmon drainage with good visibility. Almost immediately after that visibility ahead deteriorated rapidly. I had no chance to descend because of facing trees in Salzer and went from marginal VMC to possible low cloud in a matter of seconds. At this point I decided reverse course to exit back toward Hetta/Hydaberg. I had started a climb to be in a wider part of the valley and started a right turn. At some point in this maneuver I observed what I thought was a patch of water just to the right of my nose. I reduced my turn to fly toward it, and then recognized it as a patch of snow on the side of Jumbo mountain. It was then too late to continue my turn. With steep terrain rapidly approaching, I leveled the wings, pushed the prop and power lever to full forward, and pulled up on the nose. The plane fell just a few feet, contacted the mountain at about 75 MPH in a slightly nose-up attitude and rapidly came to a stop on a heading of about 240 degrees. I shut down all switches, observed the plane's ELT light flashing and started pax evacuation and care. No post-crash fire. Time approximately 8:30 am.

Signed, [REDACTED]
