NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Going over to get fuel at PAWS for a flight to Big Lake then to Sweetwater AK airport for the day. Took plane out of hanger. Added 5 gal av gas from my Fuel Bag. Checked pumps. Did pre flight. Walk around - Started Engine let idle for 10 minutes. Taxi to runway. Did PA-18 Run-up. All was good. Oil Temp at 121°. Departed - all seem normal. Climbed above trees at end of runway - air craft would not maintain altitude. Thought about low level flight to Big Lake airport but decided to try and make it back to SSAK Strip. Checked - Fuel Switch - OK. Pulled Carb Heat - No Response. Pumped Fuel Throttle back and forth twice - No Response. All the time losing altitude. Made my turn back to SSAK and flew toward the airport and impacted the trees. 400 yds from SSAK on a vacant lot. After hitting the ground - turned off mags - Main Switch and exited the airplane through the bottom half of door.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Have no idea! Still wake up at night thinking about it. Was not getting fuel to engine. Just got back from flying and going to hunt bear on AK Peninsula and worked great.
