Date Report Received

The flight departed from Talkeetna Airport (PATK) at approximately 10:30 local time on September 9th 2018, for the purposes of a night instructional flight fulfilling the night-flight requirements of 61.109. Initially we departed for Palmer Airport (PAAQ), but upon arriving there, we were unable to activate the runway lights and made the decision to divert. At approximately 11:15 local time we made two landings at Wasilla airport (PAWS) and then proceeded towards Willow. We made one landing at Willow airport (PAUO) to a full stop on runway 31, taxied back, and proceeded to take off again. After takeoff, Robin climbed straight ahead to an altitude of 800' MSL before initiating a right turn towards crosswind. During that turn, Robin lost external reference to the attitude of the aircraft and became disorientated. The right bank was allowed to steepen rapidly and the aircraft lost altitude. I noticed the error and attempted to correct, but was unable to do so before the aircraft struck the ground. After the aircraft came to a stop, I helped Robin evacuate and then established communications with rescue services utilizing her cell phone.
