Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Fuselage, landing gear, and wings sustained substantial damage. No property other than the airplane was damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

A few days prior to the crash, I had noticed a 200 RPM drop in the left magneto. I did a ground run on the left magneto and checked temperatures of all four cylinders and noticed that the right front cylinder was colder than the other three. I reported this to my mechanic. We removed all of the spark plugs, and cleaned and tested each one. All were in working order so we reinstalled them. We rerouted part of the wiring harness from the magnetos to the plugs. The next magneto test was acceptable. While the airplane was in the shop, we decided to do some further maintenance. We removed the propeller, checking the main seal for oil leaks and found none. We also checked the engine area for loose nuts, bolts, connections, and etc. We also did a compression check on all cylinders, which were all
