Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Dinged landing edge slats. Damaged stabilizer, trim tab, anti-servo tab. Damaged left aileron. Damaged cowl flap. Slight damage to vertical stabilizer.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Fueled 10CT prior to flight, full both tanks. Standard preflight, no issues, cleaned windshield. Departed McGowan Rwy 07 to East. Around 8:30 pm. Saw Lak five to East, so flew North parallel to Cook Inlet to Almost Point Possession, then East to Chickadee Area, then turned South parallel to Kenai Mountains. Encountered some light turbulence as mountains were approached. Altitude 1300 ft. MSL, suddenly engine started missing, on, perhaps surging between cruise power and no power or at least very low power. I called out my day & general location info on CTAF, Kenai tower, & Kenai Radio - no responses. Evaluated landing opportunities, nothing good - Swamps & trees & possible lakes. Checked fuel valve, turned on boost pump, worked throttle. Mixture pressure up & down. Off and on thrust quite impressive. Noted we were maintaining altitude, but not by much. AGL maybe 900' est. quickly turned East hoping Mystery Creek Rd. might offer better landing site, crossed Tanner Joe Lake, turned North on Mystery Creek rd. Spotted old strip, set up to land North straight in. Retarded throttle a little late, engine smoothed up at lesser throttle, overshot best landing area, contacted Brush on right which precipitated a near ground loop to right, resulting in a 180° turn, putting tail section

into brush. AT nesting, engine was still running, well naturally, I pulled mixture, turned off fuel, and exited aircraft to assess fire risk, fuel leaks and to check Garscolator, which appeared clear.

RECOMMENDATION (How could this accident/incident have been prevented?)

After Landing, we evaluated our options. We initially tried our Sat phone, discovering it had discharged Battery, we thought about walking out to South, est. 15 miles. No bear spray or bear gun with us, and Susan Lake fire was close to exit path. It was also 9:30 pm. We decided to manually activate ELT and to try 121.5 for possible connection to over head commercial traffic which yielded contact around 10:30 w/ airliner. That crew was able to communicate our status & location to Alaska Trooper command or to ATC. Trooper Turbo prop was dispatched and flew over us around 11:30 pm, we talked on 121.5, they informed us that trooper vehicle was making its way down Mystery Creek Rd to pick us up, they did so around 2:30 am, we were in Solotna around 6:00 am.
