NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On July 22, 2019, Myself (PIC), Ken Boydston (CHECK PILOT), and Paul Pia (POI) were conducting a re-currency check ride from KBOI. We were in the VFR practice area (South West of Boise) conducting the air work portion when the right hand prop RPM began to drop. The prop wasn't a major issue at the time but I elected to discontinue the check ride and return to Boise. With all check lists completed and Kens verification of "Gear Down and Three Green lights", I proceeded to land. With a smooth landing and roll out (about 1000 feet), I began to apply the brakes (about 40 kts) when the Right Hand wing dropped to the runway veering us off the runway and into the safety zone. I then shut the left engine off and let the tower know of our problem and lack of injuries. I then proceeded to shut off all fuel and electrical systems and evacuated the aircraft. Afterward Mr. Paul Pia verified he saw the landing "gear safe lights" were illuminated.

The airplane was intact with no fuel leaks. Airport emergency services was there within a couple minutes and took care of their part. The airplane was transported to our hangar after the FAA did their initial investigation.

Departure time was 11:10 am from KBOI. Due to the fact that this was a re-currency check ride in the local area, KBOI was also our destination.
