NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Occurred at PABV on runway 20L at 1440AKDT. The purpose of the flight was instruction for required dual time for the owner's insurance policy.

1410AKDT: The owner (T. Livingston) & instructor (J. DeVries) performed a preflight inspection & briefed the flight.

1415AKDT: Taxi & run-up

1431AKDT: Owner departed 20R & entered the traffic pattern. He landed 20L to a full stop.

1436AKDT: Instructor asked to take control of the aircraft to demonstrate a different technique. The takeoff, patten & landing was smooth & controlled.

1440AKDT: Upon rollout, the tail started to come down as the stick came back. The tail started to rise again & the instructor asked "what are you doing?" The owner's feet were clear of all pedals as he replied, "nothing! what are you doing?" At that point, the tail rose too high to recover. The prop struck the ground & the plane flipped over. Hanging upside down, neither were hurt. A skid mark from the left tire was visible. When the instructor egressed the plane, he spun the tires to see if one was locked. Both spun freely.

1455AKDT: After talking to the DOT, the aircraft was flipped right side up & removed from the runway.
