

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Skwentna State: AK

ZIP: 99667 Country: USA

Latitude: _____ Longitude: _____

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 7/20/2019 Local Time: 4:00pm

mm/dd/yyyy

Time Zone: Alaska

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N6PF

Manufacturer: Piper

Model: PA-19(L18C)

Serial Number: 18-2007

Year of Manufacture: 1952

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☐ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 1750 lbs

Weight at Time of Accident/Incident: 1520 lbs

Number of Seats: 3 Flight Crew Seats: 1

Cabin Crew Seats: 0 Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Both gear legs bent. Right side cowl door broken. Bottom of fuselage tubing buckled between firewall, and front of passenger seat. Both leading edges of wings multiple dents. Boot cowl dented. Windscreen and side windows broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed LHD at about 3:15pm. Flew direct to private strip on the mid point of the Talachulitna River, which was the intended destination. The strip is oriented roughly North to South, with a windsock at both ends. Upon inspection from the air, the south end windsock appeared limp, and the north end windsock showed light gusts from the North East, favoring a North landing. The day was hot, and knowing the thermal activity could be producing variable, gusty conditions on the ground, I made a large loop, and flew back over the strip observing the windsocks again. As before, the north windsock showed light gusts from the North East, and the south windsock was limp. Still favoring a north landing.

As I set up an approach to land to the north, I took note of the light thermal turbulence coming off of the tall dark spruce trees surrounding the airstrip. I was aware that the hot, gusty winds could switch to a different direction quickly, so I kept up a little extra speed on final. The approach was going well, but on short final I felt the controls begin to lose authority, and recognizing that the wind had surely begun to blow from behind me, I added full power and commenced to perform a go around.

Although I was able to keep the plane from stalling, I was unable to gain sufficient airspeed with which to have positive input on the flight controls. The aircraft was now below the tree tops, and despite my control inputs to the right, and down the runway, along with full throttle, the aircraft rolled about 30 degrees to the left from level, and very quickly flew off to the left side of the runway.

I continued to try and correct the left turning tendency all the way until the aircraft struck a large birch tree near ground level. The plane contacted the tree just behind the firewall on the right side, and came to a stop more or less immediately, resting against the tree at the point of the fuselage and at the front of the right landing gear, with the left wing tip, and the tail both resting on the ground.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This incident could have been prevented by taking more time to assess the weather conditions, and ultimately deciding not to attempt a landing. Though a safe landing could have been possible, the challenging location of the strip, combined with the variable wind conditions, made for a very difficult landing situation.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
