Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller strike and left wing tip strike.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed Merrill approximately 11am on February 6th 2020 in N817PS with 2 other family passengers for a personal scenic flight. It was a clear VFR day with no turbulence or high winds. Approximately 12:30pm in the Knik Glacier area and by Inner Lake George, I misjudged my altitude above the snow while doing a low pass over the lake while exploring tracks in the snow. There wasn't an intention to land at that point. Due to pilot error, instead of applying full power in time to climb out of the low pass, the landing gear caught the snow and dragged the airplane down which caused a wing and prop strike. We were subsequently grounded in the snow. No injuries were sustained. Due to having a passenger approximately in his 60s, I did not want to risk him being exposed in this area and decided to utilize my Garmin InReach SOS function and stated that we had an aircraft down but no injuries and no medical assistance was required at that time. At approximately 1:30pm another pilot with skis landed and took one of the passengers to Birchwood Airport. At approximately 2:30pm a Blackhawk had arrived and took me and my final passenger out of the area.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Lessons Learned:

Risk assessment and evaluation of the situation in this scenario should have been better. I should've been aware of my confidence level not matching the flight needs. Just because I had done similar flights before, there were new elements and unfamiliarity with this particular site and snow. I am now adding additional risk assessment elements in my preflight briefing. Furthermore, snow and depth perception error is something I am more aware of and will be sensitive to. I intend to get more instruction for this with experienced pilots in order to make better and safer judgement calls.

Course of correction so far:

I went up with an instructor on February 7th and asked that we go over risk assessment, go-arounds, and go-arounds over the ski area in Merrill field to get better judgement over snow. This flight and ground portion took approximately half an hour and was beneficial to make sure I have the right mindset judging the needs of a flight as well as the importance of realizing visual illusions and depth perceptions when making decisions regarding snow. I intend to get more instruction when possible to be able to make better judgements in the future.
