Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft has damage to leading edge and and damage to the wing spar outboard of the strut attach point. Power was cut before impact however one propellor blade is bent approximately 4 inches from the tip

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Pilot departed from a nearby mountain top at approximately 1:15pm.

At 1:45pm the pilot overflew a previous landing site. The pilot decided to drag a gravel bar that was approximately 1,000 feet in length to check surface conditions before a landing attempt. Pilot had landed at this location several times previously. Aircraft was in contact with the ground for several hundred feet before power was applied for a go around.

The aircraft hit a rough section of the gravel bar that included water run off and slowed the aircraft down on the ground roll after power was applied. The aircraft flew in ground effect but did not have speed to climb, the aircraft settled and the right wheel touched water on the right side of the landing area and slowed the aircraft. Drag from the tire began to yaw the aircraft towards the opposing bank across the stream and the decision was made to cut the power and stop the aircraft. The aircraft stopped after power was cut and damage occurred to the RH wing, leading edge of the LH wing, and prop. The ELT did not activate and no other substantial damage was observed.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

If go around was made sooner with less ground roll more speed would have been retained to complete it

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
