Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

- left wing substantially damaged & torn partially loose from airframe
- right wing damage same but remained straight
- left gear damaged & bent / right gear remain intact
- prop strike through brush & small trees but prop/some damage to

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

- three hours earlier my wife & I had flown from McCarthy Alaska (Mxy, Pamy) to the Nizina subdivision airstrip 10 miles to the southeast to visit friends
- At about 7:30 PM After visiting with friends we made our way to return to McCarthy. We contacted my brother-in-law to let him know we were on the way.
- After pre flight we taxied ^{back} to the west in order to depart to the east away from setting sun & slightly downhill the airstrip is 2200 ft long & 100 ft wide in grass
- on roll out for departure to the east the plane rolled over a bump & became oriented slightly to the south and airborne
- All attempts were made to correct the planes orientation to the east but the pilot did not have directional control. Efforts to regain directional control were not successful as the rudder & the ailerons would not respond. The plane did leave the ground and drifted at a 45 degree angle to the airstrip coming to rest in the brush & small trees.

*No one was hurt

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- visually inspect the field more carefully to avoid bumps
- more time in Super Cub (PA18) to become more familiar with the plane. FAR more hours flying a Maule M-5 than a PA-18 so less familiar with the PA-18 handling
