Subject: ANC21FA065 ELT Testing Results

The AmeriKing AK-451-2 ELT was tested on November 22, 2022 under the supervision of the NTSB. When in the "ON" mode, the ELT activated and transmitted on both 121.5 and 406MHz. When tested in the "ARMED" mode, the ELT transmitted only once out of about two dozen attempts. When it was tested, the sound of the G-switch activating could be heard, but no signals were being transmitted.
