

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Birchwood State: AK

ZIP: 99567 Country: United States of America

Latitude: 61.4091056 Longitude: -149.5274975

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 04/25/2021 Local Time: 1828
mm/dd/yyyy

Time Zone: AKDT

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N77219

Manufacturer: Cessna

Model: 140

Serial Number: _____

Year of Manufacture: 1946

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☐ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 1450 lbs

Weight at Time of Accident/Incident: 1394.5 lbs

Number of Seats: 2 Flight Crew Seats: 2

Cabin Crew Seats: 0 Passenger Seats: 0

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
- ☐ Aerobatic
- ☐ Balloon
- ☐ Commuter
- ☐ Transport
- ☐ Utility

Special

- ☐ Restricted
- ☐ Limited
- ☐ Provisional
- ☐ Special Flight
- ☐ Experimental
- ☐ Special Light-Sport
- ☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)

☐ None

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 4/25/2021, I departed in my aircraft—a Cessna 140 #N77219—with Nikolai Sharp. Our flight plan took us from PABV south along the Chugach Mountains to the Turnagain Arm. We moved East along the Turnagain Arm and crossed south above Hope, Alaska. We followed Resurrection Pass south and cut over to the Quartz Creek airstrip for a full-stop landing and brief stretch.

We proceeded from Quartz Creek west out of the mountains. Once over flatter terrain, we turned South and followed the foothills to Homer, where we stopped for fuel (13 gallons). We then proceeded along the coast, climbing up to 7,000 feet above the Kenai Airport. At that point, we crossed over the Cook Inlet and followed the coast to the power lines north of Anchorage. We then climbed up to about 3,000 feet and practiced several maneuvers (steep turns, stalls, etc.). Then, we crossed the inlet toward Birchwood Airport. Halfway over the water, I completed my pre-landing checklist, including activating full-carburetor heat and waiting several minutes before reducing power. Carb heat remained on throughout the entirety of the descent. We entered the right downwind for runway 20L (the gravel strip). After turning base-to-final, I lined up to land. Close to the runway, I decided I did not like the look of the approach, so I initiated a go-around. I simultaneously de-activated carburetor heat, added full power, and removed some of the flaps. The engine sputtered lightly (as is normal during a go-around in my plane) and then accelerated to full-RPM-power. We proceeded in ground-effect along the runway until I had achieved about 60kts airspeed, when I began to climb.

As I rose to approximately 100 feet above the tree tops surrounding the southern end of the airport, I heard my engine power die completely away. Within seconds, I believed I had lost my engine. Simultaneously, I rapidly lowered pitch to preserve my kinetic energy and banked right toward the mud flats of the Cook Inlet, noticing a trough in the tree tops and feeling instinctively I was too low to return safely to the airport. As I glided toward the tree tops, I visually verified my throttle was full-power and my mixture full-rich. I noticed my indicated airspeed was 40kts (1 kt. above my flap-down stall speed) and knew I would not make the trees without stalling with my current trajectory. So, I lowered my pitch and dove for about 10 feet below the tree tops to pick up speed. As soon as the trees felt almost too close, I pulled back on the yoke and floated above the trees. I was convinced we were going to stall into the tree tops. We did not. Once I realized we had cleared the trees, I thrust the yoke forward to fan the tail above the nose into a dive. During the dive I had time to attempt to restart the engine with the electric starter button. I distinctly heard the starter gear grind, and I released the starter. I accelerated toward the muskeg below (the muskeg was at the bottom of a hill that descended about 50 feet below the tree floor). As I approached the muskeg, I leveled off and flared. We landed in the muskeg near stallspeed. I held the yoke full back, and we bounced several times, slowing, before the plane nosed over. It felt like we were going slowly (maybe 10kts). We bounced relatively gently (neither of us were hurt) onto the nose, teetered for several seconds—during which time I told Nikolai to brace for impact (though he did not hear me)—and the plane fell onto its back.

After taking several deep breaths, I braced and released my harness (lap and shoulder). Nikolai released his as well. He landed on his head (but was later cleared by the Chugiak Fire Department's medical team). We had to step out onto the passenger-side wing to get out of the aircraft, and my foot punctured the fabric.

Pathfinder Helicopters picked us up within 10-30 minutes and transported us back to Birchwood Airport, where we were met by the Chugiak Fire Department and the Anchorage Police Department.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Without a known reason for engine failure, it is impossible to determine how to prevent this accident in the future. I intend to ensure I can clear all obstructions on all future take-offs should the engine fail at any point in the future.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

The engine ceased to provide more than idle power. The cause is unknown.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

I followed checklists derived from the c140 operating manual and the c-85 operating manual, including procedures pertaining to carburetor ice.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE**Date of this Report**
