Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propellor bent and nose cone smashed. Engine cowling and windshield cracked. Top of rudder smashed. Wings rippled and likely spar break on both wings, one before the strut and one after. Left Fwd strut bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Happened at 5:30 May 26th, at the Bold airstrip at the end of Eklutna lake
Incident:

Did a couple fly by 's and low passes to look at the airport, then decided to try and land. Wind sock indicated wind coming from the tree 's but the water looked like the wind was coming from the lake. Since the runway was slanted uphill away from the lake, I decided to land that way, going east. After a couple go arounds, I touched down about the middle of the airstrip with enough runway to stop, but i braked to hard which caused the wheels to dig in and after about 20 feet the nose went over and touched and the aircraft rolled hard enough to strike the top of the tail. I was fine with no injuries and able to climb out of the window. Some people on dirt bikes were nearby and heard the crash and ran to see if they could help. Fuel did not appear to be leaking from the aircraft at all and I shut the fuel off entirely and killed all power. I then borrowed the mountain biker 's bicycle to attempt to bike out to where I could get cell service and contact authorities. A couple miles up the road, I encountered a man on a quad who gave me a ride further down the road to an anchorage police man who contacted dispatch for me because I still didn ' t have cell service. I then got a ride back to the crash site and returned the bicycle to the man who let me borrow it. I recovered my belongings from the crash site, verified there was still no fuel leak, used the radio to contact a low flying aircraft about the situation and asked them to call my emergency contacts. I then disabled the ELT because the emergency was no longer immediate, and got a ride with the anchorage police back out to cell service.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

By knowing my own limitations and realizing I was not capable at this experience level to land on a 1000 ft gravel runway I should have adhered to my personal and flying club minimums and not attempted to land on a 1000 ft gravel runway far outside of my experience level. I also should not have spontaneously decided to try and land somewhere beyond what I had planned originally with so few hours in the airframe. If I was to land in a spot like Bold airstrip, I should have been prepared for if something did go wrong and have had a way to contact emergency services or help through GPS. Furthermore, I should have recognized the faulty windsock surrounded by trees on my low passes as well as observed the small runway and decided against ever trying to land there that day. Finally, I could have landed there if I was more experienced with these things and didn't apply the brakes too hard which caused the wheel's to dig into the gravel and the plane to flip.
