NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i> Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. While flying up the Yetna river the engine started to loose power, I ran emergency checks, all checks good according to the check list, made a uneventfull precationary landing. Upon landing on the ground all systems checked out according to the check list, all control movemets was verified and fuel level checked, also checked all fuel sumps. Made several run ups to confirm engine was making appropriate power. Found the power to be within the limits acording to the checklist. I walked the site to determin the best takeoff location to provide max length, and hardest surface. I applied full power and began the takeoff roll using all avalible surface, shortly after the nose lifted off the surface I began to extened additional flaps to allow the airplane to become airborne while still over the beach, that is when the aircraft lost acceleration and I elected to reject the takeoff. I ruduced power to idle, flaps up, max brakes. The aircraft then hit a bump that causing a nose down pitching moment that caused the airplane to loose ground pressure on the mains. The reduction in braking forced me to make a hard right turn to avoid going into the water. The airplane nosed over contacting the left wing into the ground while the prop contacted the sand. I turned off the master, fuel off, mags off, and exited the right side of the aircraft. Then I was able to help exit my passanger. And clear the area. I then secured the aircraft the best the area would allow.
