Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The accident occurred during the pilot's fourth flight of the day in the subject helicopter.

The first flight of the day was an operation control flight following an engine change. Prior to this first flight the pilot performed a thorough "first flight of the day" pre-flight inspection and found everything to be in order. During this flight, the pilot was accompanied by a company mechanic. Operation of the helicopter was normal and no airworthiness items or other squawks appeared.

The second and third flights of the day were scenic air tour operations. Prior to each of these flights the pilot performed a normal walk-around inspection (checking all hatches and cowlings for security; checking all fluids and a visual inspection) and found no discrepancies. Prior to takeoff, the pilot performed a cockpit inspection and followed appropriate checklists. Each of these flights was uneventful and the helicopter performed normally.

The subject flight was the fourth and final flight of the day--a sunset tour. Again, the pilot performed a normal walk-around inspection and found no discrepancies and performed appropriate checklists. Takeoff, climb and aircraft performance for the first 35 minutes of the tour were normal. There were no indications of any problems. Weather was good and winds were light.

Approximately 35 minutes into the flight and while in straight and level flight at 1,500 feet AGL at an indicated airspeed of 130 knots and approximately 6 miles northeast of South Point, the helicopter made sudden, violent and uncommanded yaw and pitch changes. It took all of the pilot's strength attempting to control the helicopter and maintain straight and level flight while looking for an emergency landing site. The pilot made 2 May Day calls and instructed the passengers to brace for impact.
