Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft flipped onto back upon contact with a snowbank on the side of the runway. The propeller was bent, both wings were bent at the outer third position. The vertical stabilizer was bent. The fuselage had damage to the doorposts and there was bending damage at the wing attach points. The fuselage has skin rippling forward of the horizontal stabilizer.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was coming into Pilot Station from Saint Mary's and landed RWY4 as the wind was favoring that runway from the village weather report. When I landed, it was a direct crosswind. Upon taxiing in I decided I could takeoff RWY 22 after unloading if the windsock still showed that. I offloaded my freight, hopped into the plane, and started up. Before taxiing out I set my flaps to 10 degrees, set up my GPS for direct Bethel, and wrote down my times in my logbook. While taxiing to RWY 22 I went right passed the windsock which was still showing a direct crosswind. I proceeded to pull out onto RWY 22 and since it was also raining, I started a little more on the left hand side of the runway because of the crosswind and the runway becoming a little slicker. Before advancing the power, I double checked that the cowl flaps were open, that my flaps were in fact set at 10 degrees for takeoff, and that I had full left aileron into the wind. I pushed the power forward and started rolling. I eased into rotating the nose up while keeping the upwind wing down. Suddenly I was skidding to the right-hand side of the runway, so I attempted to abort the takeoff by pulling the throttle back while proceeding to slam on the brakes. I was trying to keep it on the runway and stop, but I kept going towards the right side of the runway. I then ended up running into the snowbank and flipping the plane onto its back. Once I was able to unbuckle myself and get outside the plane, I immediately called Tom Crandall the Ryan Air Chief Pilot to alert the company of the accident.

The flight departed Saint Mary's (PASM) at 17:18 AKDT for Pilot Station (OAK) arriving at 17:27 AKDT. The plane dropped off a 184 lb stove, the only revenue on the flight. The plane attempted to depart Pilot Station on a Part 91 repositioning flight to Bethel (PABE) at 17:32 AKDT.
