NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I had plane parked on ice at T66 lake ice was deteriorating I had tried to find a place to park plane during break up at local airports, Wasilla, Big lake, Anchorage, no transient parking was available anywhere. My plan was to tie up at an airport so i could fly during the time my home runway was unusable due to higher temperatures and soft field conditions. I walked my home runway early Wednesday morning and it was still frozen but the last 300 feet to the south was super soft. Our runway is split in half by a road my neighbor kept the southern half of the runway plowed out all winter and was operating on wheels. There was a 3 foot snow berm at the road from road plowing. My plan was to land and roll out short of the soft area at the south end of the strip and wait it out while the runway was unusable. my approach was picture perfect i dropped below the tree line and was stabilized the last time i looked at the airspeed indicator i was right on at 50 mph 1.3 stall speed. then I felt i made the touch down point and pulled the power. I ended up less than a foot low and my wheels hit the very top of the berm and caused the tail to pitch up, I tried to recover by pulling the nose up and adding full power with no luck. my plane nosed over and hit on the right wing tip and stopped in the nosed over position. my plan was to touch down as close to the berm as possible and avoid over running into the mud at the south end of the runway, my plane is notorious for floating in ground effect which contributed to my decision to touch down as close to the berm as possible.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should not have been so determined to touch down so close to the berm even if I floated in ground effect and over run where I wanted to be stopped the worse that probably would have happened would be being stuck in the mud.
