Rick Ruess gave Audrey Russo 2 hours of oral ground school and signed it out in her logbook.

5/15/2022

I was giving Audrey Russo her bi-annual flight review in my Taylorcraft F-19 N927AP.

5/16/2022

I introduced Audrey to the Taylorcraft F-19. She was working on getting her Taildragger endorsement. This was required for her proficiency in flying taildraggers.

We departed Anchorage International Airport and proceeded to Goose Bay airport to perform To&Gos. When we arrived, we followed existing traffic. Due to the slight crosswind, we worked on wheel landings.

On Audrey's third downwind, we applied carburetor heat across from the touch-down point and left it on. When we turned to the base leg, I heard a noise, followed by a power reduction from 1500RPM to 1300RPM. The loss of power occurred with no adjustment of the throttle, resulting in additional altitude loss.

I applied full throttle, and there was no change in RPM. We were still descending towards the cliff on the approach end of runway 26. We were below the normal glide path due to the loss of power. I decided to take the controls as PIC and divert to the beach. As we approached for landing, there were rocks and old car wrecks on the beach, which forced me to decide to land on the mud, which had a few inches of standing water visibly on top of it. As soon as we touched down, we flipped over.
