Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

damage to wings, landing gear, wing struts, vertical stabilizer and rudder.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

began take off roll mistakenly thinking I was aligned with the strip. rolled over bushes and trees adjacent to strip, damaging aircraft and rolled off the end of the strip off center and came to rest inverted.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Maintain hard limits for take off times. Don't allow external pressure from pax to bend these limits. Passenger needed to get back to PAFA for a flight he couldn't miss. Weather forecasts for the following day indicated possibility for adverse winds and precipitation, so the decision was made to go that evening. The time it took to get ready for the flight extended longer than previous limits set for time by a little bit, so we continued.
