Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Initial damage include but further inspections may show more:

Prop strike, top of Rudder impact, all four wing struts bent, left wing bow and navigation/strobe light, engine mount bent on right side, fuselage damaged at top of fuselage above cockpit, engine cowling and nose bowl, plexiglas including windscreen either bent or broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Returning from Kenai I made an approach to land on Murphy road on the north side of 07/25 runway from south to north. Due to low / flat light conditions I inadvertently drifted too far right after touching down which caused the right tire to come in contact with unplowed snow next to snow burn.

I applied left rudder and brake on left wheel with no effect due to no traction on tundra tires and warm conditions and too slow for rudder effect, the plane continued drifting right into the snow burn which caused the plane to nose over and become inverted. Runway 07/25 was not available for wheels as it is unplowed for ski equipped aircraft use.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

BFR should have been performed.

I should have waited to fly until better conditions prevailed.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
