NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This accident happened on an off airport runway. I had landed here 3 times over the prior days. Each one of these times the wind was blowing up hill. When I landed the wind was blowing up hill. I went for a hike for 3 plus hours. When I returned the wind was blowing down hill. The wind was variable, est blowing 10-15 mph. I sat on the runway for 30 min watching the wind. I did not believe I could take off down hill with the tailwind. I decided to take off up hill.

When I reached the end of the runway, I lifted off. I could feel my tail was heavy. I pointed my nose into the wind. The terrain was climbing faster than I was.

When I realized I wasn't going to clear the terrain, I choose to set it down.

I put it down on the tundra. As it slowed, it eventually rolled up on the nose.

I have run this through my head a million times. The safest answer is wait for the wind to change. Wait for the wind to blow up hill, no matter how long it takes.
