Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft destroyed. Very few pieces of the aircraft remained at the site.

No structures, people or vehicles were destroyed, damaged or harmed. (to the best of my knowledge).

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Preliminary research points to a fire either in or behind the #1 engine occurring shortly after a #1 engine failure was indicated on tracking data. Fire appears to have penetrated the #1 rear firewall and reached the #2 (inboard) main wing fuel tank causing that wing tank to explode in flight.

Tracking data, narrative, etc., are contained in documents submitted to the NTSB.

Copies of the Supplemental Type Certificate as well as recent pages of the airframe and engines 1,2,3 & 4 attached.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Unknown. Engine was a newly rebuilt engine from Anderson Aeromotive in Idaho. The engine had approximately seven hours of total time since installation on the aircraft but had made three successful flights prior to the accident with no issues noted other than a minor timing issue that was correct on Monday.

Safety recommendations to follow after investigation of the #1 engine and wing area.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Assuming this was a mechanical failure but specific type of failure is, currently, unknown.
