NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I started the helicopter and took off at 1:10pm from Lihue Airport for a 60-65 minute tour. As we descended from Koke'e out to Na Pali, everything seemed normal. I was tracking two other aircraft and coordinating my turns to keep separation from them. Standard operation. As I was finishing a turn near the open-air sea cave along the Na Pali, I smelled smoke. I immediately looked at my instrument panel to see any indication of failure. I noted nothing looked out of the ordinary, but I had made the decision to head for Kalalau Beach, where an established Helicopter Emergency Landing Zone was located. Immediately after this decision was made, I heard a pop. I thought I lost my oil cooler belt, but heard my horns going off and lowered collective. I looked at the Honopu Beach and I knew I needed to swing wide to line up with the beach and not to run out of beach area. I focused on my spot knowing I had to effectively manage my power to get to my location. I called out "Mayday, Mayday." I heard my rotor RPM driving up, so I stopped my radio call to have 100% focus. I remember being happy with my spot and I flared and pulled collective to reduce descent and forward airspeed as much as possible. Upon contact, we rocked onto our chin and then back to what I thought was going to be upright, but started to roll to the right. Once everything stopped, I wanted to prevent any fire, so I pulled the Emergency Fuel Cutoff and closed throttle. I turned off all electrical.

I then turned my attention to my passengers and making sure they were safe. All passengers were still in the helicopter with their seatbelts on. Passenger Ms. Harivel (right front seat) asked for help out of the aircraft. I exited the helicopter via the pilot's door opening, walked to the front of the helicopter, and I told Ms. Harivel to grab me and I would help her exit through the place where the front windscreen used to be. After helping Ms. Harivel out of the helicopter, she informed me that she had an old back injury and she was sore. I told her to lay down and not move. I then helped a second passenger, Mrs. Wolfe (front middle seat) out. After that, I looked back and saw passengers Mr. Johani and Mr. Wolfe climbing up and out of the aircraft from the left rear door opening. Once everyone was out of the aircraft and ok, I worked on getting help. I moved a couple of pieces of plexiglass window so they wouldn't hit Ms. Harivel when other aircraft responding to the accident came in to land. I saw the RFM and placed it with the other documents. I saw a piece of the aircraft near the shore-break brought it back to the main section of the helicopter.

A rescue helicopter arrived and put Ms. Harivel in a litter and flew her from the accident scene. The remaining three passengers were flown away from the scene in a Jack Harter Helicopters' aircraft. That aircraft returned a short while later to transport me from the scene. Before it left, I took a picture of the aircraft part I moved and told Mr. Austin Riemer (a Jack Harter employee who was left at the scene to preserve the aircraft and take photos) about it before I left. Other than pieces I mentioned, the aircraft was as it was when it came to rest when I departed.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I think that the amount and type of emergency procedures training I received really made a difference in my ability to respond to this emergency. Full-touchdown autorotation training and repetition of the necessary responses helped me effectively manage energy in the rotor system from altitude to the surface. Our safety policies, procedures, and training were instrumental in mitigation. The availability and support received from our employees and the first responders, and the community helped as well.
