Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We took off in PHKO just after 7 AM, went to first landing area, took us about 20' to get there. At about about 6000' we did power check, RPM decrease at 22.5" MAP, and then did 5 approaches to two different spots at about 5300'. We then proceeded to climb to Hualalai's summit. Before reaching it north-est at about 7500' we did attempt an OGE hover with 22" MAP and did another power check, with same result. From there we descended to the other spot. Did one approach to a pinnacle, hovered at 21.5" MAP carb heat down. Did set up another approach to same spot. Parameters looked within limits, maybe a little higher than the first one. As we were about to come to the hover the RPM drooped, carb heat was down, I came onto controls, as reflex of coming close to ground I bumped collective up a little bit without cracking on throttle, right pedal and forward cyclic to escape the situation. We made contact with ground two times before the ship rolled over at the third contact. I shut down the engine, let the student exit first and then secured the ship by turning off all equipment and fuel switches. Intended destination was PHKO.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Leave greater safety margin to form actual altitude to hover ceilings (buffer).
