Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft has sustained substantial damage, with damage to the main rotor/ tail rotor blades, main rotor gearbox, upper and lower sheaves, tail cone, landing gear, firewalls, and instrument panels

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Thursday, May 30th, 2024 helicopter N333PJ (Robinson R-22 Beta II) took off at 7:15 am HST from Kona International Airport (PHKO). On board the aircraft was Luca Studer (CFI) who was sitting in the right seat and Dylan Kerr (Student) who was sitting in the left seat. The intention of the flight was for high DA (density altitude) training in the vicinity of Hualalai, a mountain near Kona International Airport with a summit altitude of 8,271'. Instructor states that they accomplished a power check at 6000' and then did 5 approaches to a hover to one of the approved Mauna Loa Helicopter LZs. After that the decision was made to go to a higher, unapproved LZ, at an altitude of 6,500'. Instructor states that a powercheck was accomplished at 7,500'. The first approach to a hover was made with no issue. The second time around the student states that he was told to cut the corner to make a shorter final approach. The instructor states that there were no lights and that the carburetor heat was "put down" on final. Both instructor and student state that they observed RPM decay. They both state that the instructor came on the controls and attempted to push for airspeed and bring in collective in efforts to regain airspeed. The aircraft made contact with the ground 2 to 3 times before rolling over at 7:54 am HST.
