12 July 2024- Grant Tallman

Approx. 4:45pm, I was flying down the Tokositna Glacier just next to South Hunter Ice Falls. My prop RPM started declining from 82% to 40%. I attempted to cycle the prop, but that was unsuccessful. Next, I attempted to load the prop in full-forward, but this was also unsuccessful. I contacted Phil Chidekel on company and told him what was happening with my plane. We talked about possible solutions, attempted cycle & load a few more times. All attempts were unsuccessful. I relayed to Phil I was running out of options. Phil responded with it'll be a low-energy touchdown, find a good spot. I found a good spot. I told Phil that I was taking it in onto the bench. He responded that he had eyes on me, and then about 100 ft. off the ground, I relayed to passengers that we were having mechanical issues, and we would be landing in the trees, to brace when I said brace. About 50 ft above ground, I told passengers to brace and I started securing the engine. The engine was secured about 20 ft off the deck, where I said brace again. We landed in the alders. The plane spun 180 degrees to a stop. I made sure the passengers were alright. Once I was absolutely sure everyone was alright, I pressed the SOS button, and started making calls on the SAT phone to emergency services and our dispatch.

45-minutes after landing, TAT arrived in their helicopter piloted by Paul Roderick with Riley Martin, our chief pilot, taking three passengers out and back to Talkeetna. The National Park Service arrived and took two loads in an A-Star down to the toe of the Tokositna Glacier to an HH-60 helicopter, then came back for Riley and me.

All involved parties were back in Talkeetna within 3 hours when they received EMT services.
