Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to the left wing

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight departed from Coldfoot on a return leg transporting four guests back to Fairbanks International Airport (FAI). The flight was 1 hour and 10 minute flight. The weather was VFR and in dusk operations as it approached FAI. Upon entering the traffic pattern at FAI the ATC controller asked the pilot if he could make a short approach prior to the arrival of another aircraft. He accepted the short approach to RWY 02R during the approach the pilot got low and slow on the final turn. The left wing impacted the runway and the pilot initiated a go around and landed the plane straight ahead on the SKI 02. The landing was successful and the plane taxied back to parking without further incident. There were no injuries and guests were deplaned normally and escorted back to the terminal.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The Director of Operations directed a message to be sent to all pilots that they will not accept short/expedited approaches UFN. The pilot was pulled from the schedule during the investigation and corrective action determined. The pilot did file an ASAP report.
