I took off from the moose camp and at 120 feet above ground the plane engine ran out of fuel, I switched to other reserve tank and it fired up and ran for another 15 seconds & shut off. The reserve tank should have had 5 gallons of fuel. I showed 10.8 gallons onboard usable fuel at time of take off. It looks like the reserve fuel tank leaked and shows fuel stain on trailing edge of wing. I took off at approx 19:30 for a 6 minute flight back to my base Camp Cabins. I almost made the next lake and struck trees and crashed just short of water.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

I could have had more fuel onboard. It was a small lake and I was trying to conserve weight.
