Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Damage to left wing and rear horizontal stabilizers

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On September 16, 2024, a flight departed from a 1,000 ft airstrip along the Yanert River (63.63657, -148.25632) near McKinley Village, AK (PAIN) at or around 1830 local time with the pilot and one passenger. The flight's purpose was to assess the surrounding areas in anticipation of outdoor activities planned for the coming days. After approximately 30 minutes in flight, deteriorating weather conditions, including rain, led to the decision to return to the airstrip.

The pilot opted for a right traffic pattern to approach the airstrip, landing to the east. The initial approach was not stable, and the aircraft was too high for landing, prompting a go-around. On the second attempt, the approach was stabilized; however, the aircraft lingered in ground effect longer than expected, necessitating another go-around, while only a few feet off the ground.

For the climb-out after the second go-around, the pilot applied full power, disengaged carburetor heat, and set the flaps to 20 degrees. A group of approximately 50-foot-tall trees at the east end of the airstrip, along with rising terrain to the north, presented an obstacle. A slight right turn (south-easterly) was initiated during the climb-out, but the aircraft stalled, eventually coming to rest in a group of small trees. The aircraft remained upright, but spun clockwise upon impact with the small trees, causing significant damage to the left wing.

The pilot and the passenger both exited the aircraft without injury.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Not choosing to fly that afternoon; dumping the flaps to take the plane out of ground effect; choosing to go-around sooner.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
