Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Significant damage to both wings, tail section, and propeller.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I did 6 touch and goes with my instructor, dropped him off at Crowley. Taxied back to runway 25 for my initial solo. Was cleared for take off to touch and go runway 25. I took off without incident. Flew the left pattern. Made a good landing, but when i was configuring to take off again I got off center line, vering to the left. I overcorrected with too much right rudder. When I tried to correct the overcorrection with left rudder I accidentally hit the left break, which made me turn even further to the left, ultimately causing the aircraft to run off the left of the runway into the snow. When the tires hit the snow the aircraft turn over its nose. I got out of the aircraft unharmed.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Better recognize when the break is being pushed instead of the rudder.
