Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Nose gear detached, cowling bottom collapsed, empennage bottom wrinkled below rear passenger seat area, slight prop damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Making a normal right downwind approach to runway 25 at Merrill Field and had been cleared to land. On downwind, the engine power seemed to decrease and the EGT's rapidly increased. The mixture was already at full rich so I applied carb heat to richen the mixture. This brought down the EGT's and the engine seems to operate normally. After turning final, all power was lost. Tried switching mags to no avail. Time did not allow further troubleshooting. The only available landing area was the Northway Mall parking lot which was empty. I selected full flaps to minimize speed and executed an emergency landing. The curbs in the parking lot caused the nose landing gear to shear off and the plane came to rest on its nose in the snowy parking lot.
