Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left main landing gear collapsed causing damage to the engine mount and firewall. Left wingtip and aileron damaged, Prop strike.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I departed from KORS at 1:07pm and flew VFR to 1W1. The weather was excellent with light winds out of the northwest. I flew a normal VFR pattern to runway 25 and touched down just past the displaced threshold. Shortly after touchdown, a wind gust from the right caused the right wing to come up and the aircraft veered to the left with the left main gear going off the paved surface by a few inches. I used right aileron and rudder to correct which caused the aircraft to veer more aggressively to the right and start a side skid to the left. The aircraft exited the right side of the runway and crossed the parallel taxiway. As the aircraft exited the taxiway, the left main landing gear collapsed causing the nose to drop and the prop to strike the grass, stopping the engine. I shut everything down and egressed the aircraft normally and assisted my passenger in egressing the aircraft. There were no injuries or damage to property.
