Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Fuselage wrinkled/buckled behind left passenger door. Some buckling of the skin around float attachment points.
Left float (4th compartment) - buckled bulkhead and leak around skeg.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Plane departed No See Um Lodge on Kvichak River at approximately 7:45am on 7/6/25 for Pothole Lake near Moraine Creek. Terrain surrounding the lake is hilly with hills less than 50ft surrounding 3 sides of the lake. Flew over the lake to determine wind direction and speed and then set up pattern to allow for an east approach and landing. During the approach, while crossing the shoreline just before touchdown, the aircraft sunk unexpectedly due to turbulence resulting in premature touchdown in the shallow water on the edge of the lake. The left float impacted the rocky bottom in the shallow water. The aircraft launched back into the air and the airspeed was high enough for the plane to continue flying. Power was added to stabilize the aircraft and a normal landing was completed. No passengers were injured. The company was notified and sent out another aircraft, a mechanic was also contacted. The mechanic arrived on scene that afternoon to survey the extent of the damage. The passengers completed the planned day of fishing and were flown back to the lodge late afternoon by the other company aircraft.
